

Text and Documents

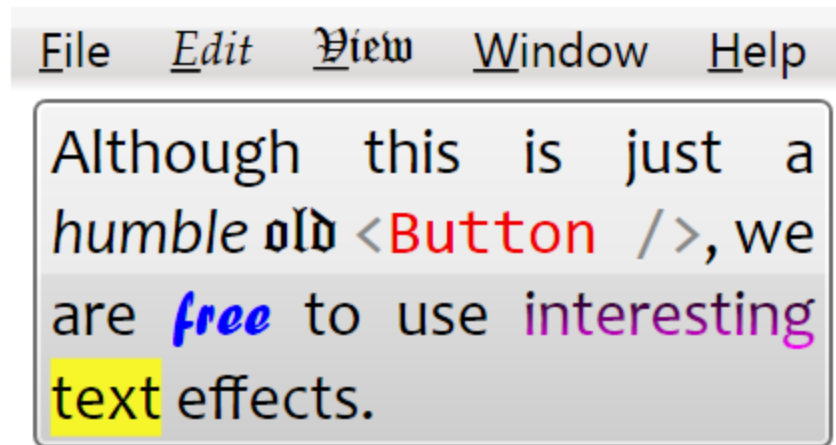

Outline

- Ubiquitous rich text
- Flow layout
- Document structure
- Editing

Rich Text Anywhere

- Text never 'plain'

TextBlock

```
<Button>
```

```
  <TextBlock FontFamily="Candara" FontSize="16"  
    TextWrapping="Wrap" TextAlignment="Justify">
```

Although this is just a *<Italic>humble</Italic>*

```
  <Span FontFamily="Old English Text MT">old</Span>
```

```
  <Span FontFamily="Consolas" Foreground="#888">
```

```
    &lt;<Span Foreground="#e00">Button</Span> /&gt;
```

```
  </Span> ,
```

```
  we are <Span FontFamily="Forte" Foreground="Blue">free</Span> to use
```

```
  <Span>
```

```
    <Span.Foreground>
```

```
      <LinearGradientBrush StartPoint="0,0" EndPoint="0,1">
```

```
        <GradientStop Offset="0" Color="Black" />
```

```
        <GradientStop Offset="1" Color="Magenta" />
```

```
      </LinearGradientBrush>
```

```
    </Span.Foreground>
```

```
    interesting
```

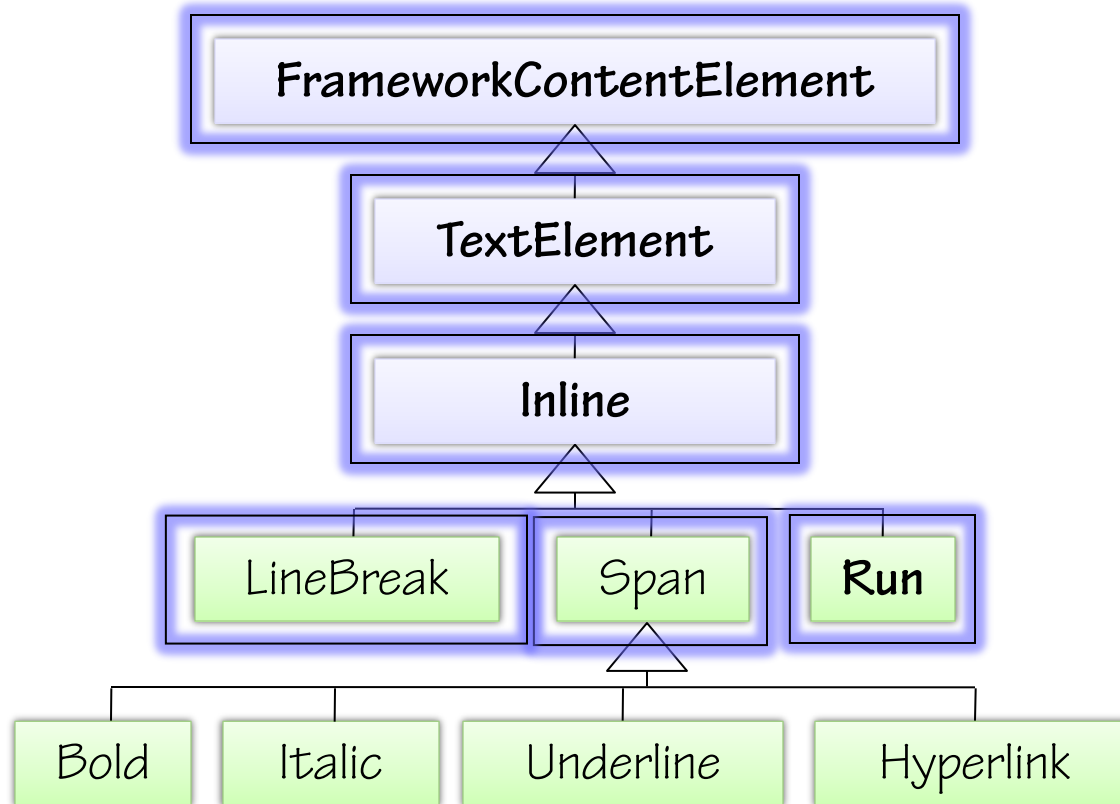

```
  </Span>
```

```
  <Span Background="#cff0">text</Span> effects.
```

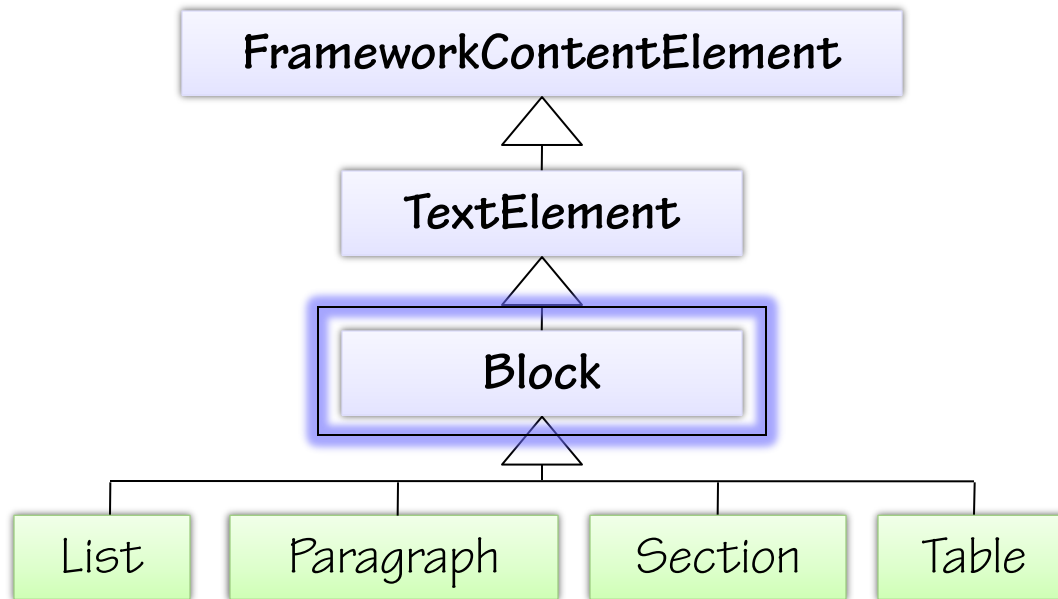

```
</TextBlock>
```

```
</Button>
```

Inline Text Elements

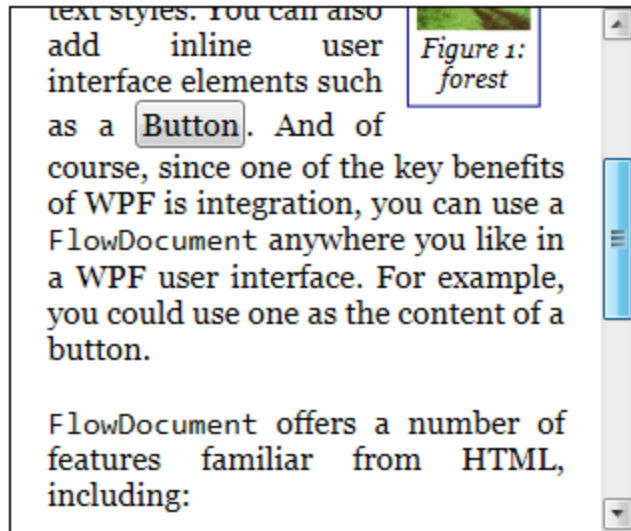

Block Text Elements

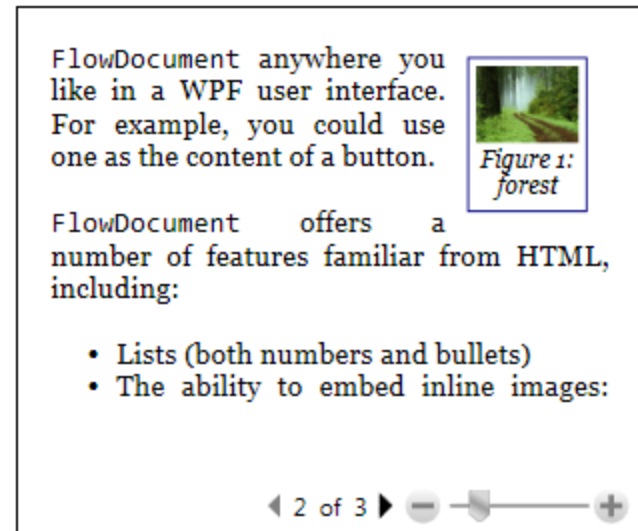

Only useful in a
FlowDocument

Document Viewer Controls

FlowDocumentScrollViewer

FlowDocumentPageViewer

FlowDocumentReader

Paragraph

```
<FlowDocument>
  <Paragraph>
    This is a paragraph.
  </Paragraph>

  <Paragraph>
    This is another paragraph. Notice how it
    starts a new line. There is also some space
    between this one and the previous one.
  </Paragraph>
</FlowDocument>
```

This is a paragraph.

This is another paragraph. Notice how it starts a new line. There is also some space between this one and the previous one.

Section

- Allows grouping of other blocks
- Structural – no intrinsic behavior

```
<FlowDocument>
  <Section x:Name="section1">
    <Paragraph>...</Paragraph>
    <Paragraph>...</Paragraph>
  </Section>

  <Section x:Name="section2">
    <Paragraph>...</Paragraph>
    <Paragraph>...</Paragraph>
  </Section>
</FlowDocument>
```

List

```
<List MarkerStyle="...">
  <ListItem>
    <Paragraph>First</Paragraph>
  </ListItem>
  <ListItem>
    <Paragraph>Second</Paragraph>
  </ListItem>
</List>
```

- First
- Second

Disc

1. First
2. Second

Decimal

- a. First
- b. Second

LowerLatin

- i. First
- ii. Second

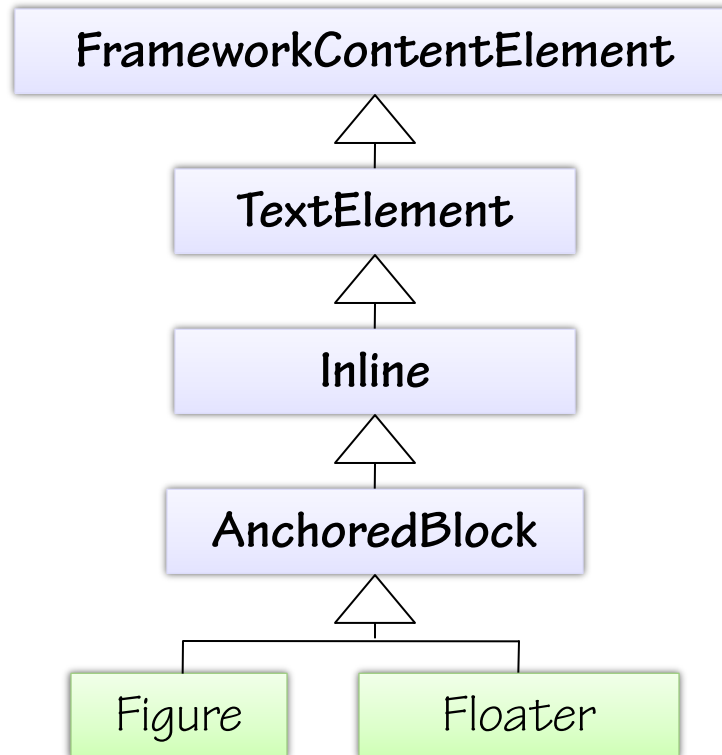

LowerRoman

Table

```
<Table>
  <TableRowGroup>
    <TableRow Background="SkyBlue">
      <TableCell ColumnSpan="3" TextAlignment="Center">
        <Paragraph FontSize="24pt" FontWeight="Bold">
          WPF Instructors
        </Paragraph>
      </TableCell>
    </TableRow>
    <TableRow Background="#FFD" FontSize="12pt">
      <TableCell><Paragraph>Name</Paragraph></TableCell>
      <TableCell><Paragraph>Age</Paragraph></TableCell>
      <TableCell><Paragraph>Favorite Color</Paragraph></TableCell>
    </TableRow>
    <TableRow>
      <TableCell><Paragraph>Ian</Paragraph></TableCell>
      <TableCell><Paragraph>33</Paragraph></TableCell>
      <TableCell><Paragraph>Blue</Paragraph></TableCell>
    </TableRow>
    <TableRow Background="lightgray">
      ...
    </TableRow>
  </TableRowGroup>
</Table>
```

WPF Instructors		
Name	Age	Favorite Color
Ian	33	Blue
Kirk	23	Purple
Brian	47	Anything in neon
Information may not be strictly accurate.		

Figures and Floaters

Floater

```
<Paragraph>
  <Floater HorizontalAlignment="Right" Width="85" Margin="3,0">
    <BlockUIContainer>
      <Border BorderBrush="Navy" BorderThickness="1" Padding="4">
        <Grid><Grid.RowDefinitions> <RowDefinition /> <RowDefinition />
          </Grid.RowDefinitions>

          <Image Source="Forest.jpg" />
          <TextBlock Margin="2" FontStyle="Italic" FontSize="13"
            Grid.Row="1" HorizontalAlignment="Center"
            TextWrapping="Wrap" TextAlignment="Center">
            Figure 1: forest</TextBlock>
          </Grid>
        </Border>
      </BlockUIContainer>
    </Floater>

    A <Span Style="{StaticResource Code}">
    FlowDocument</Span> may contain
    ...

  </Paragraph>
```

ay contain any
t. You can also
rface elements
And of course,
enefits of WPF
can use a
ere you like in a WPF user
e, you could use one as the

Figure 1:
forest

Figure

- Can be positioned further from anchor

```
<Paragraph>  
  
  <Figure HorizontalAnchor="ParagraphCenter"  
          VerticalAnchor="PageTop" />  
  
  Foo, bar  
</Paragraph>
```

Typography

- Ligatures
- Stylistic alternates
- Swashes
- Capitals
- Numerical styles
- Fractions

```
<TextBlock FontFamily="Palatino Linotype"  
  Typography.DiscretionaryLigatures="true"  
  Typography.ContextualLigatures="true"  
  Typography.StandardLigatures="true">
```

Quite effective find

```
</TextBlock>
```

Quite effective find

```
<TextBlock Typography.Capitals="SmallCaps">  
  Hello, world!  
</TextBlock>
```

HELLO, WORLD!

```
<TextBlock Typography.Fraction="Stacked">  
  1/2 + 1/4 = 3/4  
</TextBlock>
```

$\frac{1}{2} + \frac{1}{4} = \frac{3}{4}$

```
<TextBlock Typography.NumeralsStyle="Lining"  
  Text="123456" />  
<TextBlock Typography.NumeralsStyle="Oldstyle"  
  Text="123456" />
```

123456

123456

Integration

- **Two worlds:**
 - FrameworkElement: most UI elements
 - FrameworkContentElement: document elements
- **Hosting FCE in FE world:**
 - FlowDocument + reader control
 - TextBlock
- **Hosting FE in FCE world:**
 - BlockUIContainer
 - InlineUIContainer

TextBox and RichTextBox

- **TextBox:** plain text
- **RichTextBox:** FlowDocument

Summary

- Ubiquitous rich text
- Flow layout
- Block elements
- Editing
